PROFESSIONAL SUMMARY

Front-End Developer | React Specialist | JavaScript Developer

Front-End Developer skilled in building responsive, cross-browser compatible, and performant web applications using React, Redux, and modern UI frameworks. Experienced in API integration, state management, and delivering engaging user experiences. Hands-on projects include an advanced e-commerce platform, personal portfolio, and interactive web tools. Passionate about continuous learning, UI/UX design, and performance optimization.

SKILLS

Technical Skills

- **Languages & Front-End:** HTML5, CSS3, JavaScript (ES6+), React.js, Redux
- **Styling & UI:** Tailwind CSS, Material UI, Bootstrap, Sass, Framer Motion
- **Tools & Version Control:** Git, GitHub, Vite, VS Code
- **Other:** Responsive Web Design, API Integration, UI/UX Principles, Performance Optimization

EXPERIENCE

Front-End Intern – Biddigest Co. Ltd

(Sep 2025 – Present)

- Gaining hands-on experience in front-end development with React and modern web technologies.
- Contributing to real-world project workflows, focusing on responsive design, performance optimization, and API integration.
- Collaborating with team members to improve code quality and UI/UX design.

PROJECTS

E-Commerce Web Application

(React, Redux, React Router, Tailwind CSS, Framer Motion, API Integration)

Developed a responsive e-commerce web application with user authentication, product browsing, and a complete cart & checkout system. Integrated a custom fake API with product data that I collected and structured, while focusing on performance optimization despite the large number of products and images. Designed the UI from scratch using Tailwind CSS, enhanced with Framer Motion animations and dynamic toast notifications to deliver an engaging and user-friendly experience across devices.

GitHub 🔗 | Live Demo 🔗

Portfolio

(React, Motion, CSS)

A responsive personal portfolio showcasing projects in a modern design, with smooth animations and Dark/Light mode support.

GitHub 🔗 | Live Demo 🔗

Weather App

(React, Material UI, OpenWeather API)

A weather application providing real-time global weather data with a clean and responsive interface.

GitHub 🔗 | Live Demo 🔗

Image Editor

(HTML, CSS, JavaScript)

A lightweight web tool for real-time image editing (saturation, brightness, contrast, blur, grayscale, etc.) with reset and download options.
